Course Syllabus

Course Information

CS/SE 3340.501 – Computer Architecture

Term: **Fall 2019**
Days & Time and Location: TTh 5:30PM - 6 :45PM @ ECSS 2.305

Instructor Contact Information

Nhut Nguyen, *Ph.D.*
Phone: *972-883-4521*
Email: *nhutnn@utdallas.edu*
Office hours: TTh 4:00PM – 5:00PM, **also** by appointment
Office: *ECSS 3.607*

Course Pre-requisites, Co-requisites, and/or Other Restrictions
CE/CS/TE 1337 or equivalent, and CE/CS/TE 2305 or equivalent.

Course Description

This course introduces the concepts of computer architecture by going through multiple levels of abstraction, the numbering systems and their basic computations. It focuses on the instruction-set architecture of the MIPS machine, including MIPS assembly programming, translation between MIPS and C, and between MIPS and machine code. General topics include performance calculation, processor datapath, pipelining, and memory hierarchy. Students that have credit for CS 2310 or CS/SE4340 cannot receive credit for this course (3 semester hours).

Student Learning Objectives/Outcomes

After successful completion of this course, the student should

- be able to write a fully functional, stand-alone medium size assembly language program (e.g. a basic Telnet client)
- have an ability to represent numbers in and convert between decimal, binary, and hexadecimal and perform calculations using 2's complement arithmetic
- understand the basic model of a computer including the datapath, control, memory, and I/O components
- be able to program efficiently in an assembly level instruction set, including the use of addressing modes and data types
- understand the role of compilers, assemblers, and linkers and how programs are translated into machine language and executed

- be able to demonstrate comprehension of a pipelined architectures including datapaths and hazards
- understand the memory hierarchy including caches and virtual memory
- be able to demonstrate comprehension of computer performance measures and their estimation

Required Textbook:
"Computer Organization and Design - The Hardware/Software Interface – 5th Edition", *Patterson and Hennessey*, Morgan-Kaufmann, 2013. ISBN-13: 978-0124077263. ***Note: there are several editions of the same title, make sure that you get the correct edition (for MIPS***).

Required Course Materials:
> *RISC ASSEMBLER/SIMULATOR*
> It is assumed you are familiar with the PC environment, can create and edit text files, run programs, etc. The programs will be in assembly language for the MIPS processor. This course uses the MARS MIPS assembler and simulator. MARS is available, free, for download from the Internet through the site:
> *http://courses.missouristate.edu/kenvollmar/mars/*.
> The MARS simulator can assemble MIPS assembly language source files, load and run them with a users console window for input/output, and debug them if they do not work properly.

Assignments & Academic Calendar

Exams: There will be three exams during the course: two midterms and a final exam. The exams will be open notes: notes taken during the sessions can be used in the exams but no books or slides are allowed. The midterm exams will be limited to material covered during the immediate unit but the final exam is comprehensive. Test material will be taken mainly from classroom lectures.

Assignments: There will be regularly assigned reading and homework. Reading assignments should be done before the class session. Homework will require the student to spend time programming a computer outside of class. It includes a program to demonstrate the correct operation of the assigned tasks.

There will be regularly assigned in-class exercises that will be used to assess student's participation.

Assignments should be submitted using your eLearning account. Each programming assignment must contain:

1. A copy of the final working assembly language source code with comments and documentation. The file should be "text-only" and the extension must be ".s" or ".asm".

2. A screenshot showing keyboard input and displayed output from the console.

Project: A team programming project will be assigned. Details will be announced in the class.

Class Schedule

Session	Date	Topic	Reading	Assignments	Due
1	Aug 20	Introduction			
2	Aug 22	Intro to computer organization	Ch 1		
3	Aug 27	Introduction to Assembly Language Programming	Appendix A	HW #1	
4	Aug 29	Performance evaluation, Amdahl's law	Ch 1.6,1.9		
5	Sep 03	Data Representations, Bin/Oct/Hex	Ch.2.3		HW #1
6	Sep 05	Number Representations: signed, floating point	Ch.2.4	HW #2	
7	Sep 10	Instructions Representation	Ch 2.5		
8	Sep 12	Assembly Ops: Load/Store/Add/Sub/etc	Ch 2.2		HW #2
9	Sep 17	Comparing, Branching and Looping	Ch 2.7	HW #3	
10	Sep 19	Bits and bytes manipulation & other instructions	Ch 2.6		
11	Sep 24	*Exam I review*			HW #3
12	**Sep 26**	**Exam I**		HW #4	
13	Oct 01	Subroutines in Assembly language	Ch 2.8, A.6		
14	Oct 03	Comparing ISAs	Ch. 2.16-7		HW #4
15	Oct 08	Addressing modes & System software	Ch 2.10, 2.12-13	HW #5	
16	Oct 10	Integer Arithmetic	Ch 3.1-3.4		
17	Oct 15	Floating Point Arithmetic	Ch 3.5		HW #5
18	Oct 17	Input & Output		HW #6	**Project Checkpoint**
19	Oct 22	Interrupts and Exceptions	Ch 4.9, A.7		
20	Oct 24	Processor: Datapath & Control	Ch 4.1-4		HW #6
21	Oct 29	*Exam II review*		HW #7	
22	**Oct 31**	**Exam II**			
23	Nov 05	Processor: Pipelining	Ch 4.5		HW #7
24	Nov 07	Processor: Pipelined Datapath	Ch 4.6-8		
25	Nov 12	Advanced Instruction Level Parallelism	Ch 4.10		
26	Nov 14	Introduction to memory hierarchy	Ch 5.1-3		
27	Nov 19	Virtual Memory	Ch 5.4-7		
28	Nov 21	*Exam III Review*			
29	Nov 26	No Class			
30	Nov 28	No Class			
31	**Dec 03**	**Exam III (Dec 3rd)**			
32	Dec 05	*Project working time*			**Project due**

Grading Policy

The grade each student will earn from this class will be based on a weighted score calculated by using the following table:

Exam I	10%
Exam II	15%
Exam III	30%
Assignments	15%
Project	25%
Participation	5%
	100%

Weighted Score	Grade
93.0 - 100	A
90.0 - 92.9	A-
87.0 - 89.9	B+
83.0 - 86.9	B
80.0 - 82.9	B-
77.0 - 79.9	C+
73.0 - 76.9	C
70.0 - 72.9	C-
67.0 - 69.9	D+
60.0 - 66.9	D
Below 60.0	F

Grades will be assigned according to the scale on the right:

Programming assignments grading:

Code Development	30%	(compile w/o error)
Program Execution	20%	(run successfully)
Program Design	25%	(conform to spec)
Documentation	15%	(program, comments)
Coding Style	10%	(clear, efficient)

Course & Instructor Policies

- **Attendance policy:** *missing* **four** *in-class exercises leads to* **_one letter grade drop_**, *missing* **five** *in-class exercises leads to* **_an F grade_**.
- *There will be no makeup exams under normal circumstances.*
- *No late homework or assignment will be accepted!*
- *I do not read e-Learning e-mails. Please use my UTD e-mail account above for any communications.*

UT Dallas Syllabus Policies and Procedures

The information contained in the following link constitutes the University's policies and procedures segment of the course syllabus.

Please go to *http://go.utdallas.edu/syllabus-policies* for these policies.

These descriptions and timelines are subject to change at the discretion of the Instructor.
